- Powder coat paint system

ADDITIONAL OPTIONS TAILORED TO THE WAY YOUR CREW WORKS:

- Variety of fire pump choices
- Mobile pressure washer or steam cleaner
- Pond-fill suction hose
- RockGuard protective coating
- Hydraulic jack

MOBILE WATER TRAILER FOR JOBSITE WATER CONTROL

Construction sites need water in the right place at the right time. Most crews are forced to choose between two extremes: expensive water trucks or low-grade trailers that do not hold up under sustained use.

The patent-pending Water Wizard® offers a more balanced solution. This high-capacity mobile water trailer delivers rapid, controlled distribution in a towable platform.

ONE PLATFORM. MULTIPLE DEMANDS.

The Water Wizard supports essential construction site applications:

- Dust suppression
- Equipment washdown
- Standby fire support
- Water hauling for remote locations

Designed to handle additional, diverse site requirements.
